Enterprise Resource Planning

The World of Enterprise Resource Planning

Enterprise Resource Planning (ERP) is a comprehensive software system that integrates and manages core business processes within an organization.[1] By centralizing data and facilitating seamless communication across departments, ERP systems enhance efficiency and provide a unified view of business operations.

At its core, ERP can be envisioned as the central nervous system of a company, consolidating various functions—such as finance, human resources, supply chain, and customer relationship management—into a single, cohesive framework. This integration allows for real-time data sharing and improved decision-making across all levels of the organization.

ERP systems operate through a unified database that supports multiple functions used by different business units. When information is entered by one department, it becomes immediately available to others, ensuring consistency and accuracy. For instance, when the sales team records a new order, the inventory management module updates stock levels, the finance module generates an invoice, and the production team is alerted to fulfill the order—all in real time.[2]

> ❝
> ERP applications can help a corporation become more self-aware by linking information about production, finance, distribution, and human resources together.
> – Investopedia

Implementing an ERP system offers several advantages:

▸ **Enhanced Efficiency:** Automating routine tasks reduces manual labor and the potential for errors, streamlining operations.
▸ **Improved Data Accuracy:** A centralized database ensures that all departments work with the same up-to-date information, facilitating better coordination.
▸ **Scalability:** ERP systems can adapt to the growing needs of a business, accommodating new processes and increased complexity.
▸ **Regulatory Compliance:** Many ERP systems are designed to help organizations comply with industry standards and regulations by providing accurate reporting and audit trails.

ERP systems are versatile and find applications in various sectors:

▸ **Manufacturing:** Companies like Siemens have employed ERP to unify global management, leading to streamlined operations and enhanced data visibility across multiple locations.
▸ **Retail:** Boll & Branch utilized ERP to monitor transactions and gain real-time financial insights, which proved critical during significant investment evaluations.
▸ **Healthcare:** ERP systems in healthcare centralize patient records, streamline administrative tasks, and improve billing and claims processes.
▸ **Construction:** ERP software assists in managing complex projects, tracking costs, and enhancing collaboration among stakeholders.

The Global Landscape

In 2024, the global ERP software market experienced significant growth, driven by the increasing demand for operational efficiency and the widespread adoption of cloud-based solutions. The global market is expected to grow from USD 149.53 billion in 2024 to USD 165.55 billion in 2025 at a compound annual growth rate (CAGR) of 10.7%.[3] This growth is largely due to business process optimization, integration needs, legacy system replacement, regulatory compliance, and global expansion.

Market Size (in USD billion)

Cloud-based ERP solutions gained substantial traction, with the cloud ERP market estimated to reach USD 84.7 billion in 2024, up from USD 72.75 billion in 2023, and forecast to reach USD 98.24 billion in 2025, reflecting a CAGR of 16.4%.[4] This growth was driven by technological advancements and the accelerated digital transformation across industries.

Regionally, North America maintained a dominant position, accounting for approximately 42% of the global ERP software market. Europe and the Asia-Pacific region also contributed significantly, with shares of around 30% and 23%, respectively. A notable trend in 2024 was the integration of artificial intelligence (AI) and real-time analytics into ERP systems, enhancing decision-making processes and operational efficiency. Additionally, there was a shift towards eco-friendly and sustainable ERP solutions, reflecting a broader commitment to environmental responsibility within the industry.

Market Size (in USD billion)

In terms of success stories, TechnologyOne, an Australian enterprise software company, reported a record pre-tax profit of USD 61.5 million in the first half of the fiscal year, an 18% increase from the previous year.[5] This marks the company's 15th consecutive year of record profits, revenues, and SaaS fees. Company CEO Ed Chung announced plans to double the company's size within five years, driven by its Software as a Service (SaaS) offerings and global expansion strategies. Another notable development was Huawei's launch of its MetaERP system in April, 2023.[6] By May, the system had been implemented across multiple regions, including Asia-Pacific, Europe, the Middle East, Central Asia, Southern Africa, and Latin America. MetaERP now handles 100% of Huawei's internal business and supports operations in 75 countries.

Furthermore, Belgium-based Odoo, an open-source ERP provider, continued its rapid growth trajectory. By 2021, Odoo's products were used by over 5 million customers. In 2023, Odoo launched version 17 of its software, introducing significant user interface changes and new functionalities, particularly in the restaurant sector. In November 2024, the company announced that investors have bought EUR 500 million worth of its shares, raising overall company valuation past the USD 5 billion mark.[7]

These developments underscore the dynamic nature of the global ERP market in 2024, characterized by technological innovation, strategic investments, and a focus on enhancing operational efficiencies across various industries.

ERP is evolving-and fast

Traditional systems are being overtaken by Enterprise Cloud Platforms (ECPs). We're in a transition phase, and while many businesses are still hunting for the "right ERP," the actual conversation is shifting.[8]

The truth? There's no one-size-fits-all solution. No clear market winner, no silver bullet. Some platforms offer lower risk and brighter futures, but ERP has never been, and likely never will be, a "winner takes all" game.

Historically, business systems have followed a 5-tier path aligned to business scale:

▶ **Tier 5 – Micro business:** Use MS Word & Excel.
▶ **Tier 4 – Small business:** Buy MYOB or QuickBooks off the shelf.
▶ **Tier 3 – Lower mid-market:** Step up to Attache, Exo, Arrow, Sybiz via a value added reseller (VAR).
▶ **Tier 2 – Upper mid-market:** Greater functionality needed; consider Navision, Pronto, Epicor, etc.
▶ **Tier 1 – Enterprise/MNC:** SAP or Oracle.

Today, most businesses find themselves choosing between two paths:
1. **SME ecosystems** built around Xero and QuickBooks, extended by integrations-what some call "Frankenstein ERPs."
2. **Cloud-first ERP platforms,** or more accurately, **ECPs,** like NetSuite, SAP, Microsoft, Sage, and Acumatica.
This is the **SMERP dilemma:** stick with a modular SME stack or leap to a unified (and often pricier) ECP?

A major shift is also underway: **local vendors are losing ground** to global platforms. For decades, local market fit and VAR networks gave regional players an edge. Now, global providers-with scale, ecosystems, and true cloud infrastructure-are winning.

Two forces are reshaping the landscape:
▶ **SME giants** (Xero, QuickBooks) are moving upmarket with powerful integrations and best-of-breed ecosystems.
▶ **Global ECPs** are building expansive platforms with embedded flexibility and scale.
So, which ERP should you buy?
It depends. On your size, sector, ambitions, people, customers, and risk profile. There's no universal answer-only the one that fits your business today and scales for tomorrow.

[8] Paff, M. (2023). The top 10 ERP systems in the Australian Market - Value Adders. Retrieved from https://valuead-ders.com.au/2023/11/the-top-10-erp-systems-in-the-australian-market

The ERP Landscape in Pakistan

The ERP industry in Pakistan has been experiencing significant growth, driven by the increasing need for integrated management systems across various sectors. As of 2025, the market is projected to reach a revenue of approximately USD 96.83 million, with an anticipated annual growth rate (CAGR) of 14.22% from 2025 to 2029, culminating in a market volume of USD 164.80 million by 2029.[9]

The Pakistani government has been proactive in promoting adoption of ERP systems through various digitization initiatives.[10] Currently, the government utilizes the Financial Accounting & Budgeting System (FABS), an SAP-ERP-based IT platform, to manage financial transactions, improve budget management, and enhance financial control across federal, provincial, and district levels. FABS is used at the federal, provincial, and district levels, ensuring a consistent approach to financial management across the government.

In 2024, the Pakistan Airports Authority (formerly Civil Aviation Authority) announced plans to go paperless, transitioning all operations to an ERP system.[11] The government has also launched a series of digital reforms in the maritime sector aimed at transforming the country's ports into state-of-the-art hubs for international trade.[12] Karachi Port Trust and Port Qasim Authority are developing advanced ERP systems to automate workflows and improve decision-making. The Higher Education Commission has inked a contract to deploy an ambitious ERP solution to digitize administrative, accounting, operations, and end-to-end student lifecycle processes in universities.[13]

ERP in Government and Industry

Several Pakistani organizations have successfully implemented ERP systems, leading to notable improvements in their operations.

▸ **Pakistan's E-Pak Acquisition and Disposal System (EPADS),** developed by the Public Procurement Regulatory Authority (PPRA) with World Bank support, has been implemented across 27 federal ministries and 280 public departments.[14] As of July 2024, approximately 13,000 suppliers and business firms have registered with EPADS, enabling participation in federal procurement processes at no cost. The system aims to enhance transparency and reduce corruption and tax evasion in public procurement. To facilitate its adoption, PPRA has conducted specialized training for 8,500 government employees and suppliers since March 2023 and established help desks for daily technical support.

EPADS has also been extended to Punjab, Sindh, and Khyber Pakhtunkhwa provinces, with Punjab implementing it effectively since July 1, 2024. To further strengthen the system's integrity, PPRA partnered with NADRA Technologies Limited in January 2025 to integrate biometric verification services for supplier registration, aiming to verify 35,000 bidders initially and expand to 300,000.[15] Additionally, PPRA has made 25 amendments to the Procurement Rules of 2004 to streamline processes and discourage monopolies. Future plans include implementing a one-window operation and e-payment solutions in collaboration with federal financial institutions.

▸ **International Textile Limited,** one of Pakistan's largest towel manufacturers and exporters, has partnered with SAP to deploy RISE with SAP, a cloud-based ERP solution, to modernize its operations.[16] The move is hailed as a significant step towards digital transformation in Pakistan's textile sector.

▸ **KFC Pakistan** has grown rapidly in the past few years to become the country's biggest food retailer. This growth triggered a new set of challenges: the company was outgrowing its legacy automation systems. The restaurant implemented Microsoft Dynamics 365 with technology partner Maison Consulting & Solutions, who created custom modules to meet their requirements.[17] A central component of the implementation was KFC's Kitchen Display System. In the past, orders were verbally relayed from the point-of-sale to the kitchen, whereas now fully integrated real-time displays at kitchen stations handle order communication. This reduces human error and communication breakdowns and elevates the customer experience.

Pakistani fast food restaurants are increasingly using ERP systems to improve operational efficiency, reduce costs, and improve the customer experience. Several ERP and POS (Point of Sale) software solutions are available that are designed for the fast-food industry with specific features such as managing reservations, processing online food orders, tracking deliveries, implementing loyalty programs, and personalized marketing campaigns, etc. Examples of prominent local solutions include GEN SOFT,[18] Finex Cloud,[19] Websol Bawarchi,[20] etc.

▸ **Omni Group** is one of Pakistan's most diversified conglomerates, operating across sectors including agribusiness, fuel production, and energy. The company transitioned to a unified ERP system with Microsoft Dynamics AX, integrating 17 separate units under a single enterprise software suite.[21] This move has empowered managers with tools for real-time analysis and strategic planning, positioning the company for sustained growth.

▸ **Nishat Mills:** A leading textile manufacturer, Nishat Mills implemented an ERP system to streamline operations and enhance efficiency.[22] Post-implementation, the company reported a 15% increase in productivity and a 10% reduction in costs, demonstrating the system's impact on operational performance.

▸ **Engro:** Engro, one of Pakistan's most prominent conglomerates, has been using an ERP solution since 1999. More recently, the company has upgraded to a complex ERP system

that includes both SAP and Oracle solutions.[23] SAP serves as the main ERP, whereas a separate Oracle ERP system is used for managing fixed assets. Engro Foods, which manufactures, processes, and sells dairy products, juices, ice cream, and frozen desserts, recently implemented an ERP solution to improve customer service and boost sales. The adoption resulted in a 10% increase in sales and a 5% reduction in customer complaints, highlighting the role of ERP in enhancing customer satisfaction and business performance.

▶ **Imtiaz Supermarket:** Pakistan's largest retail chain, Imtiaz Supermarket, has over 14,000 employees and 850,000 customers across 26 branches. The company has significantly enhanced its operations using SAP's ERP solutions.[24] Since December 2021, the deployment of SAP Retail, Core, and SAP Customer Activity Repository has facilitated integrated inventory management, payroll processing, and automated alerts for shelving and quality checks. This integration has led to cost efficiencies and standardized services across all outlets. Additionally, Imtiaz has invested in SAP's Human Capital Management suite, including SuccessFactors modules for performance, recruitment, compensation, and employee self-services, aiming to cover the complete HR lifecycle from hire to retire.

To further streamline retail operations, Imtiaz adopted the iVend

Retail Management Suite integrated with SAP Business One.[25] The integrated system now provides synchronized data transfers between stores and the enterprise, enables better measurement of sales numbers, efficient tracking of inventory stock levels, and easy identification of slow-moving inventories. These ERP solutions have also empowered Imtiaz's e-commerce and online shopping capabilities. The integrated systems support multi-channel strategies and point-of-sale integrations, allowing for a seamless shopping experience across physical and digital platforms.

▶ **Aga Khan University Hospital:** Aga Khan University Hospital implemented an ERP system to enhance patient care and reduce operational costs. The hospital experienced a 15% reduction in medical errors and a 10% decrease in costs, underscoring the system's contribution to healthcare quality and efficiency.

A Vision for ERP in Higher Education

The Higher Education Commission (HEC) of Pakistan, with backing from the World Bank, has embarked on a transformative initiative to digitize the nation's higher education sector. This vision involves implementing advanced ERP and Student Lifecycle Management Systems (SLMS) across public universities, aiming to enhance efficiency, transparency, and educational quality.

In June 2024, HEC signed a contract with Tally Marks Consulting (TMC) to lead this digital transformation. TMC, recognized for its expertise in large-scale SAP implementations, was selected through a rigorous bidding process. The project encompasses deploying SAP S/4HANA and SAP Student Lifecycle Management (SLCM) systems, complemented by tools like KOHA and MOODLE, hosted on state-of-the-art hardware at HEC Data Centers to ensure optimal performance and reliability.

The integration of ERP systems in higher education institutions is anticipated to yield several key advantages:

▶ **Enhanced Research Capabilities:** Streamlined research processes equipped with superior tools and resources will foster significant contributions across various fields of study.

▶ **Improved Educational Quality:** Automation of administrative tasks and real-time data insights will facilitate informed decision-making,

enhancing curriculum design, student services, and faculty performance.

▶ **Capacity Building:** Comprehensive training programs through the National Academy of Higher Education (NAHE) are planned to ensure that university staff and faculty are proficient in utilizing the new systems, promoting continuous development within affiliated colleges.

▶ **Operational Efficiency:** The ERP systems will reduce administrative overhead, allowing universities to focus more on their core missions of education and research.

▶ **Reliable Infrastructure:** Hosting the integrated software on advanced hardware at HEC Data Centers will ensure efficient, reliable operations, minimize downtime and enhance user experience.

In essence, the vision for ERP in Pakistan's higher education is to create a cohesive, efficient, and transparent system that not only streamlines administrative processes but also enriches the academic experience, positioning the nation's universities at the forefront of global educational standards.

Excellence Delivered

Founded in 2010, Excellence Delivered (ExD) is a premier management consulting and IT services firm specializing in end-to-end ERP solutions, business process outsourcing (BPO), and digital transformation services. As Pakistan's only SAP Platinum Partner and the largest provider of SAP solutions in the region, ExD has established itself as a trusted partner for organizations aiming to enhance operational efficiency and drive sustainable growth through ERP-driven strategies.

ExD's commitment to excellence in ERP solutions is reflected in its prestigious partnerships and accolades. The firm holds the distinction of being Pakistan's only SAP Platinum Partner and has been recognized as the best SAP Partner for delivering cutting-edge solutions. Additionally, ExD is an Oracle Gold Partner and a member of United VARs, representing Pakistan and

neighboring countries. These credentials underscore ExD's expertise and leadership in the ERP domain.

With a portfolio of over 1,000 projects across 16 industries and operations in more than 10 countries, ExD has a demonstrated track record of delivering impactful ERP solutions. The firm's client base includes global leaders such as Pepsi-Cola, Saudi Aramco, Schneider Electric, Google, and Nike. ExD's comprehensive ERP services encompass licensing, implementation, support, and upgrades for both cloud and on-premise solutions, enabling clients to achieve significant improvements in efficiency and cost savings.

TechnoLyte

TechnoLyte is a leading software development company specializing in mobile and web-based application development using a diverse technology stack. With expertise across MERN, Shopify, PHP, Laravel, Dot.js, Wowonder, and both Android and iOS platforms, TechnoLyte also offers IT consultancy, software quality assurance, and custom solutions to meet the evolving needs of businesses.

Committed to innovation and excellence, TechnoLyte delivers end-to-end solutions, from business analysis and software development to domain registration, hosting, and security services. The company takes pride in building in-house products to accelerate delivery and provide clients with cost-effective minimum viable products (MVPs). Leveraging augmented reality (AR), virtual reality (VR), and hybrid development, TechnoLyte ensures clients receive cutting-edge solutions tailored to their specific needs.

At TechnoLyte, a skilled and dedicated team drives success through a focus on quality, innovation, and customer satisfaction. The company fosters a positive work environment that encourages professional growth, work-life balance, and a collaborative culture. With a proven track record of serving over 354 clients and delivering

421+ projects, TechnoLyte combines technical expertise with a commitment to providing affordable, scalable, and high-quality software solutions.

Through business analysis and solution development, TechnoLyte ensures that every project is aligned with the client's objectives, delivering outcomes that provide long-term business value. With a customer-first approach, the company prioritizes building lasting relationships by offering transparent communication, affordable pricing, and comprehensive support.

TechnoLyte's portfolio spans across website design, web applications, e-commerce stores, mobile applications, and software consultancy. With a team of experienced professionals, including senior full-stack developers and specialized mobile and web developers, TechnoLyte is equipped to handle projects of any scale, ensuring clients receive innovative solutions that drive business growth.

Solution Dots

SolutionDots is a leading provider of cloud-based ERP solutions, offering innovative software designed to streamline business operations, enhance productivity, and drive organizational growth. With a comprehensive approach to enterprise resource planning (ERP), SolutionDots delivers integrated solutions that unify finance, sales, inventory, HR & payroll, and other core functions into a single, user-friendly platform. As a full-service provider, SolutionDots caters to businesses of all sizes across multiple industries, empowering organizations to optimize processes, reduce operational costs, and increase profitability. The BusinessCloud ERP system provides a cost-effective and scalable solution, allowing companies to manage their operations efficiently while adapting to changing business environments.

With a deep understanding of industry-specific needs, SolutionDots offers tailored ERP solutions across various sectors. In the retail and consumer services industry, their advanced ERP systems enhance customer satisfaction by improving operational efficiency. For the healthcare sector, SolutionDots offers the Medical Fusion HIS Software (eCureHIS), a comprehensive healthcare management system designed to automate workflows and

improve patient care. The manufacturing industry benefits from innovative solutions that minimize risks and increase operational efficiency. In the telecom sector, SolutionDots provides cutting-edge tools that support rapid growth and address industry-specific challenges. Additionally, their solutions for travel and logistics ensure optimized business processes and a durable, reliable network infrastructure.

SolutionDots' diverse product suite is designed to meet the evolving needs of modern businesses. The BusinessCloud ERP integrates financial management, inventory, HR & payroll, and other key functions, eliminating the need for separate applications while providing enhanced operational control. DrivesHR is a specialized HR and payroll management system that streamlines administrative processes, optimizes talent management, and delivers in-depth data analytics. The TotalSchool Management System

offers a dynamic platform for educational institutions, facilitating improved collaboration, communication, and operational efficiency. Meanwhile, the Medical Fusion HIS Software (eCureHIS) automates hospital workflows, enhancing patient experiences through a user-friendly interface and customized features.

Operating on a Software as a Service (SaaS) model, SolutionDots offers clients the flexibility to access software remotely through a subscription-based system. This "Pay As You Go" approach allows businesses to scale operations without significant upfront investment while maintaining control over their subscription duration. By removing hardware constraints and offering cloud-based accessibility, SolutionDots enables companies to adopt advanced ERP systems with ease and cost efficiency.

SolutionDots collaborates with industry leaders such as IBM, Google, Amazon, Honeywell, and SAP, ensuring clients receive cutting-edge technology and world-class support. This commitment to technological innovation and customer satisfaction positions SolutionDots as a trusted partner for businesses seeking to transform operations, achieve sustainable growth, and maintain a competitive edge in the digital age. Through their integrated solutions and client-centric approach, SolutionDots continues to drive operational excellence and empower organizations to reach new heights.

Munshi is a SaaS-based payment management solution aimed at small and medium-sized enterprises (SMEs), simplifying financial tasks to enhance efficiency and growth. CAMS (Copying Agency Management System) is a process management system developed to integrate operations related to Copying Agencies within court systems, promoting transparency and reducing malpractices.

Primary Products

▸ **Munshi:** A SaaS-based payment management solution that streamlines financial processes for SMEs, enhancing operational efficiency.
▸ **CAMS:** A process management system designed to integrate court operations, ensuring transparency and efficiency in the provision of certified copies.

Olive Technical Services

OLIVE Technical Services (Pvt.) Ltd., a subsidiary of Fauji Fertilizer Company (FFC), focuses on delivering a wide array of services across the petrochemical, energy, and information technology sectors. As part of FFC, which operates three ammonia and urea plants producing 2.5 million metric tons of urea annually, OLIVE leverages this vast industrial experience to offer operations, maintenance, and technical consultancy services. The company is engaged in large-scale projects both locally and internationally, with expertise in sectors like power generation, plant optimization, and IT services.

The company has earned various certifications, including ISO 9001, ISO 14001, and ISO 45001, emphasizing its commitment to quality, safety, and environmental standards. OLIVE has been instrumental in several high-profile projects, including managing the operations and maintenance of a 150 MW Scatec Solar project in Sukkur and supporting the ARL Integrated Turnaround 2024, ensuring timely and successful completions. These milestones highlight OLIVE's ability to handle complex, large-scale industrial undertakings while maintaining high standards of execution and safety.

With over 40 years of experience, OLIVE Technical Services has developed a strong footprint in regions such as North Africa, the Middle East, and Far East Asia. The company's 49.5 MW wind power facility is certified by DNV GL and plays a critical role in OLIVE's renewable energy portfolio. Its primary services include turnaround maintenance and inspection, plant commissioning in collaboration with EPC contractors like Saipem and Mitsubishi, energy efficiency audits, and technical training through a dedicated Learning & Development Center. In addition, OLIVE offers advanced workshop services, including machining and fabrication for high-pressure equipment.
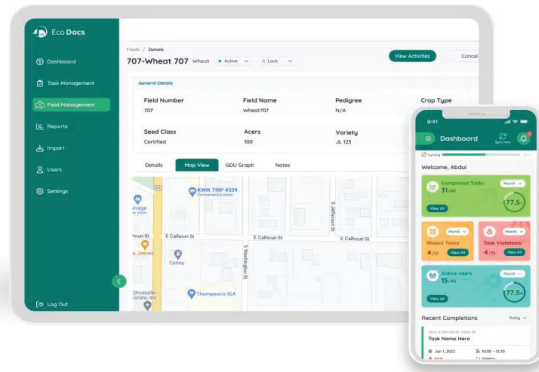

In the IT sector, OLIVE provides comprehensive SAP consultancy and cloud hosting solutions. These services complement the company's strong engineering background, offering clients a seamless integration of technical and IT solutions to optimize their operations. The company's expertise also extends to health, safety, and environment (HSE) management, with a track record of international safety awards.

OLIVE has secured substantial funding through its parent company FFC and formed key partnerships to advance its growth in the renewable energy and industrial services sectors. Its commitment to delivering top-tier technical services has positioned the company as a key player in the industrial, energy, and IT landscapes both in Pakistan and abroad.

Folio3

Folio3 AgTech is dedicated to transforming agriculture through innovative digital solutions. Specializing in software and technology for the agricultural sector, Folio3 AgTech offers a comprehensive suite of services, including farm management systems, livestock management software, IoT solutions, and precision agriculture tools. These offerings empower farmers and agribusinesses to enhance productivity, streamline operations, and implement sustainable practices using data-driven decision-making. Serving both small-scale farmers and large agribusinesses globally, Folio3 AgTech's goal is to support the agricultural industry in adopting digital solutions for efficiency and sustainability.

Folio3 AgTech has been recognized for its contributions to the AgriTech industry, earning the prestigious ISO 22000 certification, which highlights its commitment to quality and safety in its technology solutions. The company has also been acknowledged with numerous industry accolades, including being named a top app development company by SoftwareWorld and a leading app development firm for startups in 2019. Media outlets such as

ZDNet, Forbes, Yahoo!, and Reuters have covered Folio3 AgTech, further cementing its reputation as a trusted partner in agtech innovation.

Folio3 AgTech's extensive partnerships include collaborations with industry giants such as Zoetis, Angus Media, Agri Beef, and Boehringer Ingelheim. With offices in California and an international presence, the company serves clients ranging from entrepreneurs to Fortune 500 companies. Folio3 AgTech's solutions cater to local and global markets, providing customized systems that address the specific needs of different regions and farming types. Its key offerings include ERP solutions for agriculture, livestock, and crop management, precision farming tools, and food safety management software, enabling agricultural businesses to optimize their operations and achieve regulatory compliance.
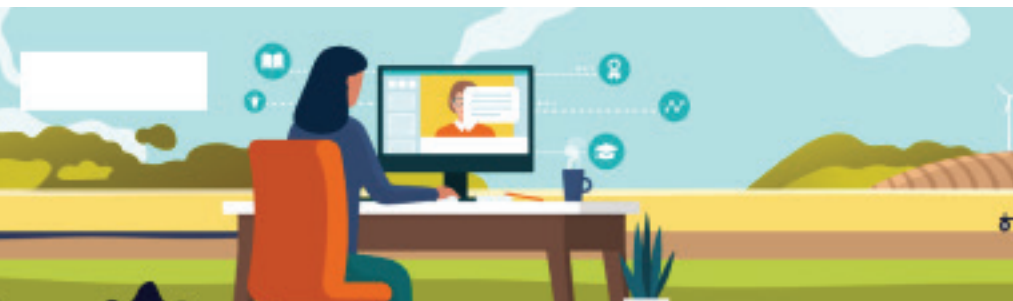

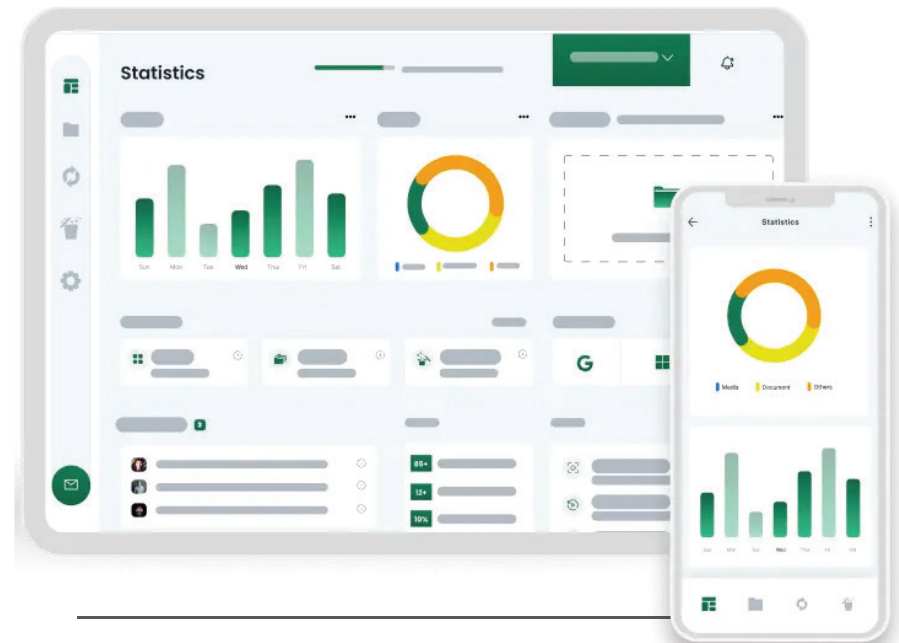

Among Folio3 AgTech's leading products are Cattlytics, a livestock management system, and specialized tools for USDA and FSIS compliance management, food safety audits, and crop and seed management. The company's expertise extends to various sectors within agriculture, offering tailored solutions for swine, poultry, cattle, and fish farming. Through its software platforms, Folio3 AgTech supports data automation, quality compliance, traceability, and task management, ensuring that farmers can manage resources more effectively while meeting industry standards.

The company has attracted significant venture capital, securing multiple rounds of funding to accelerate its

growth and expand its technological offerings. Its partnerships with venture capital firms and its collaboration with agricultural stakeholders ensure that Folio3 AgTech continues to innovate and develop solutions that meet the evolving needs of the global agriculture sector.

Premier

Premier is a leading government technology company that delivers comprehensive ICT solutions. Their services range across ERP solutions, network convergence, digital workplace transformation, cloud computing, cybersecurity, and data center management, with additional offerings such as break-fix service-level agreements and managed services. Premier has established itself as a trusted partner for businesses in Pakistan and abroad, catering to high-profile clients like Audi Pakistan, Avanza Premier Payment Services, Premier Motor Limited, and Premier Code (Pvt) Limited.

One of Premier's notable projects is the development of Avanza Premier Payment Services (APPS), a joint venture between Premier Systems and Avanza Solutions. APPS received an in-principle license from the State Bank of Pakistan to operate as a Payment System Operator/Payment System Provider (PSO/PSP), reflecting Premier's ability to navigate complex regulatory environments while promoting digital payment infrastructures in Pakistan. This venture aims to revolutionize the digital payments landscape, ensuring compliance with the country's financial regulations.

Premier's long-standing partnership with Audi Pakistan since 2006 has significantly contributed to the luxury car brand's success in the region. By providing Audi with ICT infrastructure, digital workplace solutions, and network convergence services, Premier has played a key role in Audi becoming the top luxury automotive brand in Pakistan. This partnership reflects Premier's capacity to manage sophisticated technology needs for global brands operating locally.

In addition, Premier has delivered robust ICT infrastructure solutions for Premier Motor Limited and Premier Code (Pvt) Limited, bolstering their digital transformation efforts. Premier Motor Limited has benefited from cloud computing, data center services, and cybersecurity solutions to streamline its operations, while Premier Code (Pvt) Limited has relied on Premier's managed services and break-fix SLAs to enhance its tech ecosystem.

Premier's excellence in the ICT field has been acknowledged through various awards and accolades, including the prestigious HPE Top Performing Partner of the Year Award in 2023. This recognition underscores their significant contributions to the technology sector, particularly in advancing digital transformation and cybersecurity across industries in Pakistan.

Pearl Solutions

Pearl Solutions is Pakistan's premier provider of cloud-based ERP software. Their flagship product, Pearl ERP, enhances business operations for small and medium-sized enterprises by improving customer engagement, productivity, cost-effectiveness, and operational efficiency. With advanced features such as interactive dashboards and global accessibility, Pearl Solutions helps businesses stay agile and informed at all times.

With 18+ years of expertise, Pearl Solutions stands as a leader in ERP software solutions. They offer tailored CRM solutions across various industries, backed by robust consulting, implementation, and support services. The company recently launched an AI-powered Odoo Support Agent to guide businesses in automating their manual processes, managing customer information, tracking leads, and improving sales prediction.

Their proficiency ensures businesses receive the best possible guidance and cutting-edge software to optimize performance. Pearl Solutions has successfully implemented over 100 ERP and CRM projects, serving a wide range of industries such as manufacturing, healthcare, and textiles. Their ERP system offers real-time insights, predictive analytics, and seamless integration with other systems, empowering businesses to make data-driven decisions. With its flexible architecture, Pearl ERP scales alongside their client's business, ensuring long-term success.

Sapphire Consulting Services

Sapphire Consulting Services (SCS) is a leading technology and management company, established in 2005, with a reputation for delivering innovative solutions to clients worldwide. SCS provides a comprehensive portfolio of technology and business services, enabling organizations to enhance efficiency and achieve strategic goals.

SCS specializes in solving complex business challenges in sectors such as Government, Banking and Finance, Manufacturing, Education, Broadcast Media, and Telecommunications. The company's expertise spans multiple domains, including ERP (Financials, Supply Chain, HCM, Manufacturing, Projects), Electronic Banking, Enterprise Service Bus/Middleware, Portals, Managed Services, and Customized Software Development.

SCS has automated the vehicle registration process for the Excise, Taxation & Narcotics Department, developed asset tracking and project management solutions for Works and Services Department, and built analytics solutions for the Sindh Revenue Board. They have automation, analytics, and blockchain solutions for prominent banks, including Habib Bank Ltd., Atlast Bank, and State Bank of Pakistan. During the pandemic, SCS provided Covid Assessment Mobile App and GIS-enabled dashboards to the Provincial Disaster Management Authority (PDMA) to track and control the spread of Covid.

SCS is a trusted partner of Oracle, IBM, and SAS, offering deep proficiency in major suites and technologies such as IBM WebSphere, IBM Information Management (ECM), Oracle Fusion Middleware, Oracle WebCenter, Java/J2EE frameworks, PHP (CodeIgniter, Symphony), CMS platforms (Joomla!, WordPress, IBM ECM), and databases like Oracle, IBM DB2, and MySQL.

With a commitment to bringing together people, technology, and business, Sapphire Consulting Services continues to empower clients with cutting-edge IT solutions and industry expertise, building on a legacy of excellence and innovation.

DWP Technologies (Pvt) Ltd

TECH Division, a part of DWP Group, has established itself as a prominent IT solutions provider since its inception in 2001. With a strong presence across 28 cities in Pakistan and a portfolio of over 2000 satisfied customers, it stands as a testament to consistent growth and reliability. TECH Division delivers comprehensive IT solutions, catering to the diverse needs of businesses with its extensive range of products and integrated services.

DWP Group's TECH Division is a Tier 1 partner in Pakistan with globally renowned technology leaders, including DELL, CISCO, EMC, MICROSOFT, SAMSUNG, ORACLE, EMERSON NETWORK POWER, and XEROX. This prestigious recognition underscores its commitment to delivering world-class IT solutions and building strong partnerships with industry giants. The division has consistently earned accolades from both international and local forums, cementing its reputation for excellence and innovation.

With a proven track record spanning over two decades, TECH Division has successfully served over 2000 satisfied customers across 28 cities in Pakistan. The company offers unmatched services in enterprise computing, voice and data networks, and business intelligence solutions. Its specialization in end-to-end IT solutions includes N-Tier software development, B2B/B2C content management, and robust technology infrastructure solutions. Additionally, its expertise extends to cutting-edge fields like data warehousing, architectural design, and intelligence training, further solidifying its position as a market leader.

Enterprise Resource Planning

Kwick High Tech & Solutions

Kwick High Tech & Solutions (Pvt) Ltd is a leading provider of Smart Card and Identity Assurance Solutions for the Communication, e-Government, and Banking sectors. Headquartered in Pakistan with a branch in the United Kingdom, they deliver cutting-edge solutions worldwide, driving technological advancement and innovation.

As Pakistan's exclusive GSM SIM Card manufacturer, they have set industry benchmarks in secure digital transactions and biometric verification. Their expertise has been recognized through successful deployments in SIM issuance, banking digitalization, and secure communication solutions. They are an Oracle Gold Partner and an active member of P@SHA and PSEB, collaborating with industry leaders to push technological boundaries.

Kwick High Tech & Solutions (Pvt) Ltd stands as Pakistan's exclusive GSM SIM Card manufacturer, setting industry benchmarks in secure digital transactions and biometric verification.

They have successfully pioneered biometric verification solutions, which have been effectively implemented for SIM issuance. Their expertise extends to comprehensive digital banking solutions, including mobile wallets and Know Your Customer (KYC) verification, revolutionizing banking convenience and security. With headquarters in Pakistan and operations in the UK, they continue to expand their global reach. Additionally, their proficiency in artificial intelligence and software development enables them to lead innovations in IoT, Smart Cities, and Fintech, empowering businesses with cutting-edge technology.

ITROOS

ITROOS stands out as an innovative software house, dedicated to helping businesses overcome challenges through technology. Their approach goes beyond simply delivering software, emphasizing collaboration and digital transformation to empower clients. In addition to providing software, ITROOS assists clients in establishing cost-effective remote teams. Over the past decade, they have served a wide range of clients, including industry leaders such as Coke, Pepsi, and Servis Industries, within Pakistan and internationally in countries like New Zealand, Australia, Singapore, Nigeria, South Africa, Turkey, Germany, Canada, the UK, and the US.

Established in 2014 under the Seronic Group, ITROOS has quickly gained a reputation for excellence and high-quality standards. Their extensive experience covers consultancy, deployment, operations, and managed IT services across multiple divisions. They have successfully collaborated with Coca-Cola Icecek and Haidri Beverages, demonstrating the effectiveness of their Cooler Lifecycle Management solution.

ITROOS enjoys a 92% positive feedback rate and has completed 146 projects with an average cost of $28 per hour. Their specialties include Professional Employer Services, Managed IT

Services, Staffing, Enterprise Solutions, Mobile Application Development, and more. Known for rapid prototyping, Agile Manifesto-driven values, and pragmatic product management, ITROOS ensures scalable SaaS/mobile solutions and offers comprehensive training & consultancy services. Their AI-based chatbot and CRM & Call Center solutions exemplify their innovative capabilities.

Octek Private Limited

Octek is a pioneering IT solutions provider renowned for its innovative approach to technology and digital services. Specializing in ERP solutions, software development, IT consultancy, and digital transformation, Octek excels in crafting tailored solutions that drive business success. A standout in their portfolio is their expertise in game development, where they leverage cutting-edge technology to create immersive and engaging gaming experiences.

By combining their advanced technical skills with a deep understanding of the gaming industry, Octek delivers high-quality games that captivate and entertain users. Their commitment to excellence across all service areas ensures they effectively address the diverse needs of their clients and stay ahead in the dynamic digital landscape.

Octek distinguishes itself with a commitment to exclusivity and uniqueness, aiming to shine in every success story. Established in 2019, the company quickly expanded its footprint across Gulf countries, the USA, and Australia. Their extensive tech stack and focus on a diverse range of industries-from FMCG to real estate-underscore their adaptability and expertise.

Octek's business philosophy revolves around delivering tailored, high-quality solutions that address specific client needs, ensuring they stand out in the competitive IT landscape.Octek boasts a team of over 80 professionals and has successfully completed 120 projects across various sectors.

> *We have been working with Octek for the past 5 years, there has never come an occasion where our problems were not solved or our requirements were not met. The level of professional excellence their engineers present is still unmatched, it always feels like they actually care!*
> *– Oliver Farago, Chief Technology Officer*

> *Octek delivered a tailor-made ERP solution that streamlined our entire workflow. From inventory management to real-time analytics, their team's expertise transformed our business processes, leading to unprecedented efficiency gains. Grateful for a partner that truly understands our unique challenges*
> *– Marko Cadez, Chief Executive Officer*

Gicoh

Gicoh specializes in developing robust and scalable enterprise-level software solutions tailored to help businesses thrive in dynamic and competitive markets. With a focus on innovation and user-centered design, the company provides a suite of powerful products and services that streamline operations, enhance efficiency, and support business expansion.

Among Gicoh's flagship products is G2, a comprehensive online ERP solution equipped with modules such as accounting, procurement, sales, inventory, manufacturing, human resources, and CRM, all of which can be integrated with RMS or POS systems. GSSM, the Secondary Sales Management tool, enables organizations to manage financials, track field staff in real time, and oversee distributor-to-retail order management and performance. GRMS is designed for retail chains and franchises, offering an ERP-integrated solution that supports the management and scaling of physical and franchise outlets. GDeliver, a delivery app, allows businesses to efficiently receive, track, and manage customer orders from registered outlets.

Beyond products, Gicoh delivers an array of services including cloud and infrastructure development, web development, mobile app development, IoT solutions, and customized consultancy services. These offerings are built around a core philosophy that values people, community, and relationships above processes and tools. At its heart, Gicoh is a people-driven company that prioritizes collaboration, trust, and long-term partnerships in every aspect of its operations.

Primary Products

▸ **G2 - Enterprise Resource Planning**
▸ **GSSM - Secondary Sales Management**
▸ **GRMS - Retail Management System**
▸ **GDeliver - Delivery Application**

> *GRMS not only streamlined our sales but also provided excellent features for inventory and customer management. Using GRMS has led to cost savings and simplified employee training, allowing even those without prior POS experience to use the system easily.*
> *– Kamran Iqbal, Head of Retail Operation*

TMR Consulting

TMR Consulting is a trusted Microsoft Gold Partner and Tier 1 Cloud Solution Provider, dedicated to helping organizations navigate and accelerate their digital transformation journeys. With a proven track record of delivering tailored Microsoft solutions, TMR Consulting serves clients across diverse industries with a comprehensive suite of services and products designed to optimize operations and drive long-term growth.

As an ISO 27001 certified company, TMR Consulting upholds the highest standards in information security and data protection. Backed by a team of Microsoft-certified consultants, the company provides expert consultation, seamless implementation, thorough training, and ongoing support for Microsoft's full product portfolio—including Dynamics 365, Microsoft 365, Azure, Dynamics GP, Dynamics AX, and Dynamics CRM.

Their services span enterprise resource planning, cloud solutions, digital marketing, SEO, web development, and custom software development. TMR Consulting also offers end-to-end ERP consultancy services that help businesses achieve higher efficiency and profitability. With a client-focused approach, they have successfully delivered hundreds of implementations in Pakistan, the UAE, Canada, and the United States.

Industry expertise includes sectors such as retail, insurance, construction, banking, public service, education, logistics, pharmaceuticals, oil and gas, energy, telecom, non-profit, and manufacturing. Each solution is designed not only to meet technical requirements but to create tangible value by improving business agility, enhancing user experiences, and providing intelligent, data-driven insights.

With a mission centered around empowering businesses of all sizes through Microsoft technologies, TMR Consulting fosters a collaborative ecosystem of innovation and excellence—helping organizations adapt, grow, and lead in an ever-evolving digital world.

Business Line Company

Business Line is an SAP Gold Partner recognized for delivering advanced ERP solutions, seamless SAP integration, and expert consulting tailored to the evolving needs of modern businesses. With deep-rooted expertise and a commitment to excellence, the company empowers organizations across diverse industries—including finance, manufacturing, retail, healthcare, and logistics—to enhance efficiency, embrace automation, and achieve sustainable growth.

Operating across the MENA region and beyond, Business Line supports small and medium enterprises by providing scalable, customized solutions that drive digital transformation. Their experienced team ensures that every SAP implementation is aligned with each client's unique operational goals, helping businesses streamline processes, optimize resource use, and unlock new levels of performance.

The foundation of Business Line is built on innovation, integrity, and customer-focused service. Their approach prioritizes accountability, cultivates forward-thinking strategies, and is driven by a genuine passion for delivering meaningful impact through technology. By integrating systems and enabling data-driven insights, Business Line helps organizations improve decision-making, track performance effectively, and adapt confidently to market demands.

With a strong focus on cultivating long-term client relationships, Business Line continues to transform businesses worldwide with SAP-powered solutions designed to foster agility, scalability, and lasting success.

Maven Media Group

Maven Media Group is a boutique digital agency known for delivering impactful marketing solutions to businesses across the globe. With expertise spanning Search Engine Optimization (SEO), Pay-Per-Click (PPC), email marketing, eCommerce and B2B digital marketing, and organic social media, the agency helps brands navigate the complexities of the digital landscape and establish a strong online presence.

Backed by a team of seasoned marketing professionals, Maven Media Group understands the challenges businesses face in gaining visibility and traction in competitive online environments. By leveraging a results-driven approach and the latest digital tools, the agency consistently helps clients attract their target audience, drive traffic, and increase conversions.

With a firm belief that digital marketing should empower rather than burden business owners, Maven Media Group takes a collaborative approach—offering complimentary audits to assess alignment with client goals and tailoring strategies to meet specific business needs. Their dedication to measurable outcomes and deep understanding of market dynamics allow them to craft strategies that generate real value and long-term success.

From boosting search engine rankings to enhancing customer engagement across platforms, Maven Media Group supports businesses at every stage of their digital growth journey. Their focus remains on helping clients thrive in an ever-evolving digital marketplace by turning visibility into opportunity and strategy into success.

Aquila360

Aquila360 is a team of Microsoft-certified professionals with over a decade of industry experience, dedicated to transforming businesses through innovative IT services. With a presence in Canada, the US, and the UAE, the company focuses on helping clients transition from traditional paperwork to fully digitized, scalable solutions. Aquila360 specializes in modern web and mobile applications, Office 365, the Power Platform, and advanced Azure cloud integrations, utilizing the latest technology stacks to meet evolving market demands.

The company is equipped with versatile technical expertise, enabling them to adapt products to both user requirements and market needs. Their service capabilities span across Azure and AWS cloud architecture, Azure DevOps, Microsoft SharePoint (both on-premises and online), and the full Dynamics 365 suite—including Sales, Finance and Operations, Business Central, and custom data integrations.

In addition, Aquila360 demonstrates proficiency in Power Platform tools like Power BI, Power Apps, Power Automate, Logic Apps, and the Common Data Service. Their database capabilities include SQL Server, Azure Cosmos DB, AWS RDS, Firebase, and MongoDB. The development team excels in front-end and back-end frameworks such as Angular, React, Node.js, and ASP.NET, along with

mobile app development using React Native, Flutter, and native Android technologies. Their UI/UX processes encompass research, design, and usability testing to deliver seamless digital experiences.

Aquila360 is built on a foundation of collaboration and adaptability. Each project is approached not just with technical expertise but with a contextual understanding of the client's business objectives. Their responsive and flexible working model ensures solutions are tailored precisely to strategic goals, with an emphasis on long-term success.

The company also cultivates a strong internal culture, treating employees as valued family members. With market-competitive salaries, generous leave policies, provident fund contributions, and performance-based bonuses, Aquila360 emphasizes employee well-being. Benefits such as medical coverage, fuel allowances, child education support, and continuous certification opportunities create a supportive and growth-oriented environment. Regular team dinners and company-wide initiatives foster a close-knit, collaborative community. Through this balanced approach, Aquila360 continues to grow as a trusted partner in digital transformation.

Geeky Bugs

Geeky Bugs is a technology solutions company shaping the future through innovation, creativity, and precision. In an increasingly connected world, the company stands at the intersection of design and development, crafting tailored digital experiences that empower startups and large enterprises alike. With a commitment to driving results, Geeky Bugs supports business growth and corporate innovation by delivering cutting-edge solutions across a variety of platforms.

From UI/UX design to custom ERP systems, web and mobile app development, the team transforms ideas into impactful digital products. Their development lifecycle is meticulously structured—from gathering requirements and cost estimation to architecture design, coding, rigorous testing, and ongoing maintenance—ensuring efficiency without compromising quality. Each phase is guided by experienced professionals dedicated to aligning the final outcome with the client's vision and business objectives.

Geeky Bugs also offers flexible engagement models to suit diverse business needs. Clients can choose to work with full project teams or integrate skilled developers directly into their internal teams. Whether through dedicated "Team as a Service" arrangements or project-based

collaborations, the company ensures seamless communication and execution through daily standups, retrospectives, and continuous integration.

With deep domain expertise in fintech, Geeky Bugs has played a pivotal role in building core banking platforms, payment gateways, digital wallets, and compliance-driven systems. Their work accelerates innovation in financial services, strengthens cybersecurity, and enhances operational efficiency. By managing the full spectrum—from backend infrastructure to intuitive mobile applications and intelligent financial tools—Geeky Bugs delivers reliable, scalable technology that keeps pace with an ever-evolving global market.

HexaLyze Consulting Services

Hexalyze Consulting Services is a forward-thinking IT firm dedicated to empowering businesses through transformative technology solutions. As partners of Microsoft, Odoo, IceWarp, and Huawei Cloud, Hexalyze specializes in turning outdated systems into intelligent, automated, and data-driven platforms. With a strong belief in collaboration and innovation, the company aligns closely with clients to unlock their full potential, fostering sustainable growth through digital excellence.

Established in 2014, Hexalyze has consistently delivered high-performance solutions across a global client base. By combining strategic insight with technical expertise, the team transforms ideas into real-world innovations. With a client retention rate that reflects trust and satisfaction, Hexalyze continues to serve over 300 businesses with a focus on efficiency, adaptability, and impactful results.

From enterprise resource planning and mobile application development to business intelligence and robotic process automation, the firm delivers comprehensive solutions tailored to each organization's unique needs. Their expertise extends to building collaborative portals and streamlining workflows through business process management, enabling companies to drive efficiency and gain a clear operational overview.

Hexalyze stands out by making data actionable, guiding clients to smarter, faster decisions while enhancing internal collaboration and overall productivity. Their approach embraces agility, ensuring that businesses remain ahead of market trends while optimizing internal processes and empowering teams through technology—not replacing them. With over a decade of experience and a future-focused mindset, Hexalyze continues to drive digital transformation for businesses worldwide.

Thanks to the SharePoint implementation by Hexalyze Consulting Services, our team has experienced significant improvements in collaboration and communication. The platform is user-friendly.
– Abd al-Uzza, Project Manager

The ERP implementation by Hexalyze Consulting Services has been a game-changer for our business. We now have a single platform for managing all our operations, which has improved our decision-making and boosted our bottom line.
– Ahmed Rafiq, IT Manager

ITKnocks

ITKnocks is a dynamic consulting firm dedicated to delivering transformative business solutions through the Microsoft technology ecosystem. With a global team of skilled professionals, ITKnocks empowers organizations to navigate complex challenges by integrating cutting-edge tools such as Microsoft 365, Dynamics 365, Power Platform, Power Apps, Power Automate, Power BI, SharePoint, and Azure.

Renowned for its client-centric approach, ITKnocks combines technical expertise with a deep understanding of industry-specific needs, offering tailored solutions across sectors including construction, financial services, healthcare, and manufacturing. By focusing on seamless collaboration and innovation, the team ensures measurable value and lasting impact for every client.

From customer engagement through Microsoft Dynamics 365 CRM to resource optimization via Dynamics 365 ERP, ITKnocks helps streamline processes, improve productivity, and unlock new opportunities. The introduction of Microsoft's Copilot AI further enhances digital experiences, offering intelligent, intuitive interaction beyond conventional chatbots.

Driven by core values of empathy, reliability, accountability, and integrity, ITKnocks fosters meaningful partnerships and upholds the highest standards in every engagement. With over 60 talented engineers, 100% certification achievements, and thousands of business hours saved, ITKnocks continues to redefine operational excellence and drive digital transformation across the globe.

Primary Products

▸ **Dynamics 365 CE**
▸ **Dynamics 365 ERP**

> *We've nothing but to say Thanks to the ITKnocks Team because of their attention to details, asking such questions which let us revalidate our internal process, quality documentation and solution presentation is amazing.*
> *– Lee Clark, Director of IT, CIO*

> *ITKnocks empowered us with Dynamics 365 automation and Power Platform integration, creating a unified data store accessible across locations. Their deep understanding of our business enabled seamless process automation on Microsoft technologies.*
> *– Victor Liondas, Chief Executive Officer*

Symtera Technologies

Symtera Technologies (Pvt.) Ltd. is a global IT solutions provider and part of a multinational group with headquarters in the United States and a strong presence across Europe, South America, and Asia. With a comprehensive portfolio spanning ICT, artificial intelligence, business intelligence, fintech, digital healthcare, SEO, SEM, enterprise server and email hosting, data centers, eCommerce, mobile applications, and surveillance systems, Symtera delivers innovative, end-to-end solutions tailored to evolving business needs.

Now expanding operations in Pakistan, Symtera is building on a foundation of leadership and experience. The local team of advisors, engineers, and developers brings over 200 years of combined expertise, focused on delivering exceptional customer support and both standardized and customized software solutions. With a reputation for excellence in managed services, the company continues to serve regional and global clients with professional IT and digital marketing services designed to accelerate growth and digital transformation.

systems

Systems Limited

Systems Limited is a globally acclaimed technology services company that has been at the forefront of digital innovation since 1977. With a legacy spanning over four decades, the company has established itself as Pakistan's premier IT firm, offering cutting-edge software solutions and business process outsourcing services to clients across the globe. From government bodies to Fortune 500 enterprises, Systems Limited delivers tailored computing strategies that address diverse industry challenges with precision and agility.

Backed by a team of over 8,500 dedicated professionals across its offshore facilities, Systems Limited consistently prioritizes client success by focusing on empathy, strategy, and innovation. Their wide-ranging capabilities encompass digital transformation, cloud technologies, advanced analytics, and business applications—empowering

organizations to modernize legacy systems and drive meaningful change.

With more than 600 successful projects across the United States, Europe, the Middle East, Africa, and Pakistan, Systems Limited continues to expand its global footprint. Its strength lies not only in technological expertise but also in its human-centric approach, translating complex challenges into impactful solutions that generate long-term value.

As a trusted partner to both private and public sector entities, Systems Limited is recognized for its consistent excellence, adaptability, and commitment to delivering flexible, high-quality software solutions. Its inclusive, innovation-driven culture and robust global presence reinforce its position as the top IT exporter in Pakistan and a leader in the international technology landscape.

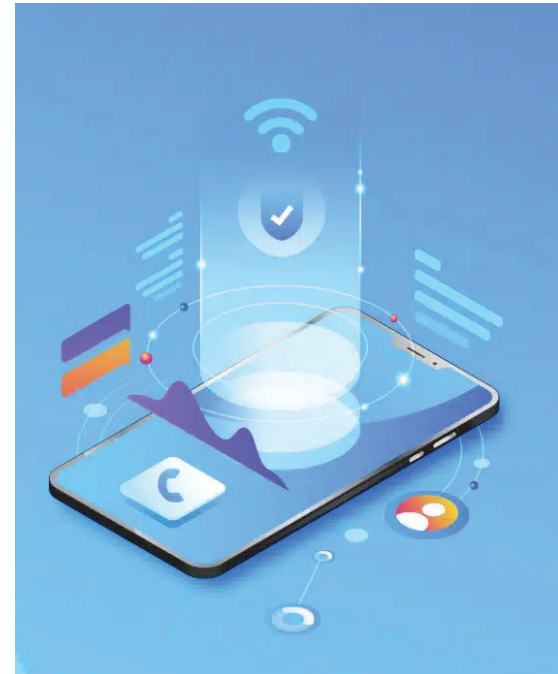

JbS
Works Better.

Jaffer Business Systems

Jaffer Business Systems (JBS), established in 1982 as a division of Jaffer Brothers, has been a pioneering force in Pakistan's IT landscape for over four decades. With a commitment to innovation and customer-centric solutions, JBS has partnered with global technology leaders to deliver transformative IT services. Their expertise spans complex technology implementations, system integration, managed services, and large-scale digital transformation projects, positioning them as a trusted partner for businesses seeking to navigate the evolving technological landscape.

JBS's dedication to excellence has been recognized through several prestigious awards. In 2024, they were honored with the Microsoft Partner of the Year Award for Secure Productivity Excellence, distinguishing them as the only Pakistani company to receive this accolade that year. This award underscores their proficiency in enhancing security and productivity through Microsoft solutions for prominent clients in the telecom and banking sectors. Additionally, in 2019, JBS was named the Performing Partner of Sophos in Pakistan, reflecting their commitment to delivering top-tier cybersecurity solutions.

With a workforce of approximately 800 employees and an annual revenue of $33.2 million, JBS has successfully

completed over 1,000 projects, solidifying their reputation as a leader in the IT industry. Their strategic focus on AI and sustainability is evident in their partnerships and product offerings, such as a widely used personal finance management app boasting hundreds of thousands of users globally. JBS's presence in markets such as the USA and Saudi Arabia further exemplifies their commitment to delivering innovative solutions on an international scale.

KAISPE

Kasipe

KAISPE is a global technology solutions provider committed to empowering businesses through digital transformation. With offices in the USA and Pakistan, KAISPE specializes in delivering tailored solutions using Microsoft Dynamics, Azure, Power Platform, Oracle NetSuite, and advanced analytics. Their expertise spans enterprise applications, IoT-based asset monitoring, business productivity tools, and data analytics, enabling organizations to enhance operational efficiency and adapt swiftly to evolving market demands.

KAISPE's dedication to excellence is reflected in its strong partnerships and industry recognitions. As a Microsoft Co-Sell Partner and Indirect Reseller, KAISPE collaborates closely with Microsoft to deliver innovative solutions. Their team comprises professionals with experience from leading organizations, bringing a wealth of knowledge and a commitment to

delivering high-quality, reliable solutions that drive client success.

With a team of over 50 professionals, KAISPE has successfully delivered more than 1,000 projects to over 100 clients across North America, Europe, the Middle East, Africa, and Asia. Their unique selling points include a strong presence in Microsoft marketplaces, offshore development expertise, and a focus on leveraging data analytics to unlock business insights. KAISPE's commitment to quality, loyalty, responsibility, and innovation positions them as a trusted partner for organizations seeking to navigate the complexities of digital transformation.

A Technology Power House

MicroLinks

Microlinks (PVT) Limited is a dynamic IT firm based in Pakistan, specializing in delivering comprehensive technology solutions tailored to diverse business needs. With a focus on innovation and quality, Microlinks offers services ranging from web and application development to cloud services and digital marketing. Their team comprises expert consultants, experienced developers, skilled designers, and proficient QA engineers, all dedicated to streamlining and enhancing business performance through modern resources and proactive IT solutions.

While specific awards and accolades are not listed, Microlinks has established itself as a pioneer in providing services to the Capital Market. Notably, they have developed settlement, risk management, and accounting systems for Pakistan's first and only professional clearing member. Their innovative solutions, such as digital onboarding for equity and commodities and integration of payment gateways for instant fund transfers, underscore their commitment to advancing financial technology in the region.

Microlinks has successfully implemented a range of products and services, catering to various sectors including education, manufacturing, finance, and retail. Their solutions, like the Tradelinks Trading Application and

SEAMS ERP System, have been instrumental in facilitating online trading and back-office operations for brokerage companies. With a client base that includes prominent organizations, Microlinks continues to drive digital transformation by offering tailored solutions that meet the evolving demands of modern businesses.

Cybersoft Vantage

CyberSoft Vantage (CSV) is a dynamic technology solutions provider, specializing in helping startups, SMEs, and enterprises accelerate their business growth through embedded engineering, outsourced software development, and digital transformation services. Since 2019, CSV has built a diverse portfolio spanning solution implementation, emerging technologies, software development, and digital marketing — all tailored to empower clients to innovate, expand, and lead within their industries.

CSV takes pride in its strategic partnerships with globally recognized technology providers, including Salesforce, ServiceNow, AWS, and Mulesoft. These partnerships validate CSV's technical expertise and its ability to deliver reliable, high-performance solutions. The company holds a strong reputation for excellence, backed by a consistent 4.9-star client rating and recognition at leading industry events for its quality software services and business transformation outcomes.

With a talented team of 100+ professionals across two global offices, CyberSoft Vantage has successfully delivered 150+ projects across industries like healthcare, e-learning, IoT, and finance. CSV's strength lies in its comprehensive service offering — from cloud migrations, AI, and AR/VR development to RPA, embedded software, and custom app development. Its agile delivery models, close technology alliances, and rapid implementation frameworks allow CSV to build and deploy enterprise solutions up to 3x faster than conventional firms.

The Next Rex

The Next Rex is a versatile IT and engineering solutions provider offering a unique subscription-based model for web design, app development, ERP systems, and engineering services. Their expertise ranges from website and mobile app development to cloud hosting, network security, and customized enterprise systems. They are particularly strong in delivering management systems for schools, clinics, restaurants, and retail operations.

The Next Rex has earned a solid reputation for customer satisfaction, with a portfolio featuring clients like The Mechanics Auto Repair, AS Appliances, and Ali Jee. They are backed by a leadership team with international credentials — including a CTO with a master's from Georgia Tech and experience handling network security for Fortune 500 companies and global institutions.

With 30+ years of leadership experience, The Next Rex has supported thousands of users through its products and services. Their edge lies in subscription-based services, fast delivery times, and comprehensive IT-to-engineering project execution. Their ERP suite, including School Management, Clinic Management, POS, and E-learning systems, highlights their strength in cloud-based, industry-specific solutions tailored to operational needs. The Next Rex provides a range of cutting-edge services including Web Development, Mobile App Development for iOS and Android, ERP Systems such as School Management, Clinic Management, POS, and E-learning solutions, Network Security for enterprise protection, Cloud Hosting for scalable business needs, and specialized Engineering Services for industries like retail and hospitality.

> *I never thought implementing School Management System could be that easy. With their user-friendly software and dedicated team, our staff was trained in a day.*
> *– Sarah Lins, Principal*

> *With their Clinic Management System, I can manage my clinic, appointments, and accounts easily. Their friendly team was always there for me.*
> *– Harley Mark, CEO/Doctor*

Skynet Solutions

Skynet Solutionz is a high-end custom software development company committed to delivering innovative IT solutions that drive business success. With over 25 years of combined team experience, they offer a full spectrum of services, including bespoke application development, mobile app development, e-commerce solutions, and software testing. Their approach integrates business consulting with technological expertise to provide practical and cost-effective solutions tailored to client needs.
