

MINISTRY OF IT & TELECOM

The LEAP logo is a large, stylized white graphic. The word "LEAP" is in a bold, sans-serif font. The letter "P" is replaced by a circular icon with a horizontal line through its center, resembling a stylized "P" or a network node. The entire logo is set against a background of vertical light streaks in shades of blue and green.

ASTRIK (PRIVATE) LIMITED

Company Profile

Astrik is a Pakistan-based enterprise technology company with operations in the UAE, building AI-powered software and digital platforms for modern organizations. Our product portfolio includes Synclo, an AI-native ERP for all business operations; Chattrik, an enterprise communication platform; and ClassPedia, a learning and knowledge platform.

Alongside our products, we partner with organizations across telecom, retail, service industries, and government to deliver custom AI solutions, enterprise software, automation, and cloud technology, tailored to how each business actually operates, not retrofitted from generic templates. Our mission is to build technology that simplifies complexity, empowers people, and helps organizations thrive in an AI-driven future.

DIGUP AI

Company Profile

Every serious creator today pays for five AI subscriptions and still switches between them all day. DigUp AI ends that.

One subscription. Every leading AI model. One workspace.

DigUp doesn't build another mediocre model Ñ it gives you the best one for every job. Reasoning, writing, images, video, voiceover, code: for each task, DigUp identifies what you're asking for and routes it to the model that leads the market in that discipline. You describe the outcome; DigUp chooses the engine.

Ask for a campaign and get the copy, the visuals, and the video back together Ñ each produced by a different best-in-class model, delivered as one finished result.

For agencies, that means faster output and a single bill instead of five. For students and creators, it means access to premium AI at one accessible price.

TEAMO SMC PRIVATE LIMITED

Company Profile

Teamo is a global staff augmentation firm helping technology companies and enterprises build, manage, and scale dedicated software engineering teams without the overhead of direct employment. Founded in 2016, headquartered in Delaware, USA, with hubs in Islamabad, Pakistan and Dubai, UAE, Teamo has spent a decade connecting businesses across North America, Europe, and the Gulf with rigorously vetted senior engineers from emerging talent markets.

Activities span the full hiring lifecycle: sourcing, vetting, and placing engineers, plus payroll, equipment, benefits, compliance, and performance tracking. Through Teamodoo, its ERP arm, Teamo also delivers pre-configured Odoo implementations for real estate, retail, e-commerce, and manufacturing firms. Teamo acts as a true extension of each client's team, backed by a 14-day risk-free trial.

BUSINESS 2 BUSINESS SOLUTION

Company Profile

Fennix helps executives understand why their numbers moved, while there is still time to act.

Most companies can see what happened. The harder question is why, and the answer usually sits in another department or outside the company entirely. Fennix connects a company's internal data with external signals such as competitor pricing, market trends and published financial statements, then explains the cause and recommends action. Every figure is tagged to its source.

Fennix Intelligence (Private) Limited is SECP-registered in Karachi and certified to ISO/IEC 27001:2022. The platform runs in the cloud or fully on-premise, and serves mid-market companies across Pakistan and the Gulf.
